World Class Surfacing
Solutions & Specialties

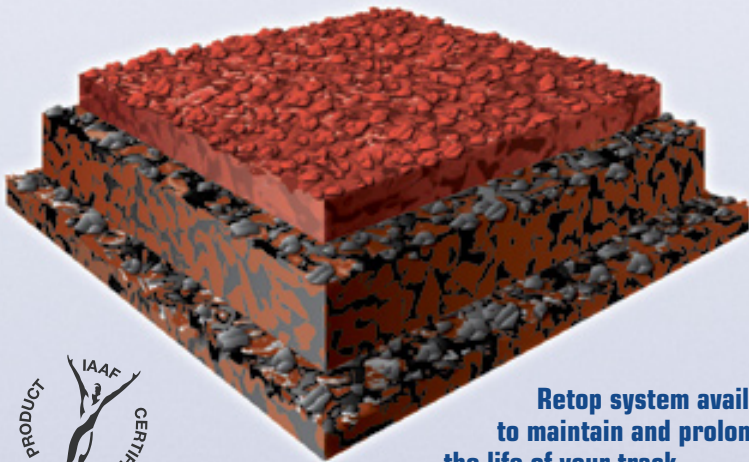

Rekortan® M99

Description

Rekortan M99 is a 3-layer, 15 mm, impermeable full pour system. It consists of a self-leveling flood coat, a unique central force-reduction layer and a flood and chip topcoat of polyurethane and embedded EPDM rubber granules.

Layers

- Avg 3 mm base layer consisting of SBR rubber and Qualipur 5050
- Avg 8 mm middle layer consisting of SBR rubber and Qualipur 5050 SA
- Avg 4 mm top layer consisting of Qualipur 5050 and EPDM rubber granules

Retop system available
to maintain and prolong
the life of your track

Highlights

- IAAF approved system
- Featuring APT's unique polyurethane micro-foam that significantly increases force reduction
- Formulated to resist UV degradation in the world's most demanding climates
- 100% solid polyurethanes
- Top layer poured-in place installation for a seamless finish
- Embedded surface ensures excellent all-weather performance and spike resistance
- Fast Track Since 1969
- Premium colors available upon request
