ULTIMATE CUSHION

Marathon Athletic is the manufacturer of the ultimate cushion tennis surface. Marathon has combined its proven running track technology with its line of World Class Acrylic coatings to make **Ultimate Cushion**

Ultimate Cushion is a dual durometer tennis surface. The 7mm thick rubber base mat ensures the system is soft underfoot for a joint friendly experience and the firm textured coating provides a consistent tournament quality ball bounce. **Ultimate Cushion** is twice as thick as standard cushion surfaces.

Ultimate Cushion can be installed over concrete or asphalt and is available in an assortment of single or two tone colours. Marathon can customize the speed of the court to suit the personal needs of the most discerning client.
